

Company

We established Dataprime Solutions Pty Ltd in 2002 to provide specialised solutions to business. We felt that our combined years of experience in complementary industries, our range of expertise, and the high level at which we had functioned would allow us to offer clients a quality of service not commonly available.

Positions held by us in the past enable us to fully appreciate the need for a prompt and focussed service, and the need to minimise costs. Consideration of these factors is foremost in the company's service philosophy.

Our aim is to provide clients with a superior quality of service, delivered on schedule and within budget. Our hope is that we can assist clients to realise their full business potential and growth.

Services

We offer the following specialised services:

- 3D Modelling & Visualisation (images, animations and interactive models)

Working Directors

Robert Foster

Rob has 17 years of experience providing support and solutions to employers in Australia, Brunei (2 years) and Japan (6 years). In Japan, he was based in Tokyo and held management and support positions on oil and gas projects in Japan, China, Korea, Brunei, Singapore, Malaysia, Indonesia, Oman, Qatar and Abu Dhabi.

Rob has provided a wide range of services during this time, including:

- production of 3D computer models, graphics and animations for job tender presentations, component prototyping, maintenance and operation manuals, training manuals, and promotional videos;
- design, implementation and management of custom database applications, addressing the needs of various disciplines including; engineering, procurement, construction, commissioning, quality, safety, administration, inspection and testing, document control, and scheduling/progress measurement;
- implementation of local area networks (Tokyo, Abu Dhabi, Oman) and a wide area network (Tokyo/Munich/Abu Dhabi) configured to provide simultaneous data, voice, fax and video conferencing functions;
- project planning, scheduling and reporting;
- computer hardware and software procurement, installation and management;
- application of MS Office software and VBA to a wide range of business tasks.

With his skills and experience, and a drive to always produce his best, Rob is well qualified to offer clients a superior standard of support and service.
